\$260,000

3 Bedrooms | 1 Bathroom | 1,031 Sqft

With 3 bedrooms, 1 bathroom, and approximately 1,000 square feet, this Sangaree home offers a practical layout and strong value in a growing area. Tucked away on a quiet cul-de-sac, the setting provides a little extra privacy while still keeping you close to everything you need. One of the standout features is the absence of an HOA, giving you more flexibility and freedom with your property -- something that's becoming harder to find in such a convenient location. If you've been searching for a home that offers a great combination of location, space, and everyday livability, this is one you won't want to miss.
