\$725,000

3 Bedrooms | 2.5 Bathrooms | 2,081 Sqft

A rare deep-water opportunity for the visionary buyer with the expertise to bring it back to its full glory. If you've ever dreamed of owning deep water, this is your chance. This 3-bedroom, 2.5-bath home sits on the Ashley River and includes a shared dock that needs some TLC. The first floor offers an open-concept living space combining the family room, dining room, and kitchen. Just past the family room, a spacious sunroom takes in wonderful views of the river. Upstairs you'll find all three bedrooms and two full baths. The attic was finished at one point and has been used as additional living space. The attic is heated and cooled. The dock is a shared dock and the right side belongs to this property. It has a spot for a lift, which is covered, and a floating dock. Please see attached documents in regards to the shared dock and the engineer inspection in regards to the structural issues.
