\$675,000

3 Bedrooms | 2 Bathrooms | 2,038 Sqft

This is a great mid-century ranch with a beautiful yard with lots of curb appeal in highly desirable Sandhurst. Live in the house now in its current condition with a few updates, or use your imagination to renovate to the house of your dreams. This home has a living room/study and dining room to each side of the foyer when you walk in, and then there is a large kitchen area with a pantry and an opening into the family room, plus a breakfast area with built-ins. Lots of storage and kitchen space to work with. The family room has a brick fireplace and opens up onto a sunroom overlooking the backyard. The sunroom is not included in the sq. footage, but the sunroom adds about 209 additional sq. ft. The only living area without wood floors is the family room. There are wood floors under the carpet in the bedrooms. Both the primary bedroom and one of the guest bedrooms have walk-in closets. There is an oversized two car side garage with 2 additional storage/laundry areas. The home has an encapsulated crawlspace. The dehumidifier was replaced in 2024 and the system was inspected by the dehumidifier company recently under a bi-annual inspection program. One of the main noticeable attributes when you drive up is the landscaping of the yard and the pretty setting the house is nestled in. The setting with the trees and shrubs really does add to the curb
