Step into this spectacular 2-year old home that has an abundance of living space and storage space! From the large covered front porch, you are welcomed into the Foyer with two Secondary bedrooms and a full bathroom to the right. The door to the left leads to the attached 2-car garage, upgraded with epoxy flooring. Just ahead is the open concept living area, including the Living Room, separate Dining Room with tray ceiling, and open Kitchen. The Kitchen features a large island with counter seating, Granite counters, Stainless Steel appliances (including gas range), and eat-in Breakfast area. Off the breakfast area, the patio door leads to a screened back porch with views of the pond and wooded buffer, offering a sense of serenity and privacy. The Primary Suite is also on the main level, featuring a tray ceiling, spectacular views of the pond, and ensuite bathroom with walk-in shower, dual sinks, large walk-in closet, and linen closet. Upstairs, there's an oversized bonus room (with it's own walk-in closet for added storage), a 4th bedroom (with walk-in closet), the 3rd full bathroom, and another storage closet at the top of the stairs (seriously so much storage in this home!). This space is great for another living space, a guest room, Mother-in-law suite, a teen hangout or playroom, or used as a yoga/fitness space like the current owners have it set
